COMMITTED TO BUILDING SOLID, STUNNING BUILDINGS WITHOUT LIMITS

When we started building 14 years ago, we learned that the most important service we could provide for any customer was an enjoyable building experience from beginning to end. This meant that every detail, point of contact, and the finished product would be above & beyond ordinary. Our brand is built by a trail of satisfied customers, and their success has become our own.

Over the years, we have done everything we could to have happy customers. This includes hiring people that are great to work with, researching limitless options to go above & beyond the square box and have an unparalleled quality in our finished product including all manufactured elements and workmanship. Today, we tie all of this in with industry leadership, a great warranty, and our own hands-on industry knowledge.

We hope you enjoy working with your Remuda Team. As always, feel free to contact myself directly if you have any questions or concerns with your building project. I'm always happy to help.

Steve Schouten, Founder & CEO

"Remuda Building constructed a custom-designed heated farm shop and equipment cold storage building for us. We couldn't be happier with the end result! From the sales and planning to the top-notch construction crew we have nothing but good things to say! "

— Craig, Didsbury AB

REMUDA TEAM VALUES

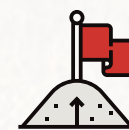

Customer Centric

We're up-front with all costs and offer continuous planning support

Team

Each crew we employ is trained to work hard for you

Leadership

We maintain and even set the highest standards in post frame building construction

Warranty

Building assurance that your Remuda Team stands behind one hundred percent

Options

Create high-quality unique buildings with our tried and true options selections

Quality of Product

You will be happy with the end result from aesthetics to longevity of your building

Experience

Over 80+ years of combined industry knowledge and a very hands-on focus to the construction of the project

Pioneering Homes

Pioneering the way into modern beautiful post frame lifestyles

STRUCTURAL COMPONENTS

We are often asked, "What makes your buildings better?"

It's the details that make the difference.

From engineered details that are constructed to take the worst of the prairie weather, to ensuring that your insulated building is sealed and won't have uninvited guests in the walls, we go above & beyond in constructing the strongest, longest lasting building in the industry.

Trim Details

Your building comes complete with custom trims designed to keep weather out

Vented ridge cap – A properly vented attic means a longer lasting building

J-trims on eave walls

Posts

Posts are glued, pressed, and nailed, with treated wood for all ground contact portions of the post.

Roof System

Roof and truss system – Engineered to meet the requirements of your local area

W bracing – Additional truss bracing to ensure stability in the most extreme conditions

Web and bottom chord bracing – Each roof system has an engineered requirement for inside web and bottom chord bracing

Truss Connection

With each truss bearing on a set of posts, your truss is fastened to the posts with structural lag screws, giving it more than 14,000 lbs of shear strength.

Wall Pans

This interior detail ensures a completely sealed wall cavity preventing rodents and provides ground-to-wall insulation value.

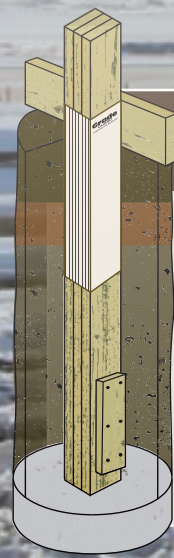

BUILDING SOLID STRUCTURES WITHOUT LIMITS

FOUNDATION OPTIONS

Every Remuda Building starts with a strong foundation, engineered for each specific application. We have built hundreds of unique buildings and have pushed building innovation to make each one a reality.

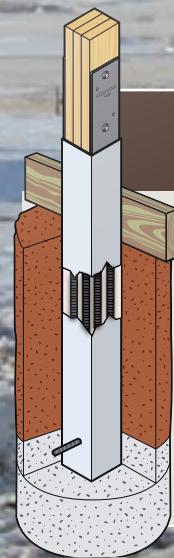

All posts are set on a concrete base engineered and sized according to your building.

GRADE GUARD

A polyurethane sleeve that protects the post where it matters

- LIGHTWEIGHT
- FLEXIBLE
- STRONG
- COST-EFFECTIVE

PERMA COLUMN

A pre-cast concrete column that replaces wood in the ground

- CONCRETE
- RESISTANT
- COST-EFFECTIVE

Combined 80+ Years in Post Frame Building Knowledge

Remuda Building was founded under the belief that both the quality and longevity of our workmanship should reflect the rural culture and communities we build for. Established over a decade ago by the owner Steve Schouten, we have grown and evolved alongside our specialized and experienced team. Remuda is dedicated to providing our clients with top quality buildings.

We continue to research methods and innovations from the foundation up to make all client building dreams a reality – while ensuring that each and every structure meets or exceeds engineering requirements.

BUILDING STRONG FOUNDATIONS

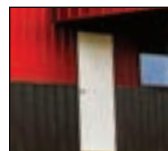

EXTERIOR OPTIONS

"These people are extremely capable. I highly recommend that you give them a chance to build your next post frame building."

— Isaac, Gleichen AB

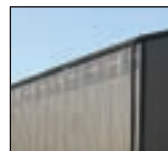

BUILDING YOUR LANDSCAPE

ASK ABOUT OUR ENDLESS EXTERIOR OPTIONS

Entrance Doors

Insulated, high quality with lots of options to choose from. Designed to last

Polycarbonate Wall Lighting

A cost-effective way to let natural light into your storage building

Cupolas

Functionally and aesthetically, cupolas finish off that country-style look

Windows

Dozens of sizes, shapes, and colours. Opt for function and quality

Soffit & Fascia

2' overhangs for attic venting in modern, urban or country designs

Exhaust Fans & Dampers

Exhaust systems sized to meet your building requirements

Exterior Building Wrap

Prevent drafts and ensure a long-lasting building seal

Eavestroughs & Downspouts

5" continuous steel eavestroughing and downspouts

Lean-to

Roof or wall attached in every size, shape, closed-in or wrap-around

Equipment Doors

Overhead, bifold, sliding, with or without windows or glass panels

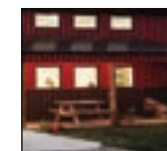

Fir Posts & Details

Wood detail options to set your building apart

Wainscoting

A cost-effective way to give any building a high-quality look

Porches

Get out of the rain and add a great look to your building

Colour

Choose from a wide variety of colours across all the options available

INTERIOR OPTIONS

"The craftsmanship and customer service was above and beyond anyone else!"

— Sonja, Cluny AB

BUILDING NEW STANDARDS

ASK ABOUT OUR ENDLESS INTERIOR OPTIONS

Concrete Slab

All slabs include necessary drains, and come with optional floor heat

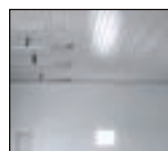

Mezzanines

Stairs and railings give you optimal storage or second-story functionality

Kickwalls

Popular options for riding arenas to prevent damage to the building and animals

Perforated Liner Panel

Decrease the sound and echo in your new interior

Finished Interior Packages

Outer walls, ceilings, and demising walls completed with finesse for a clean, bright look

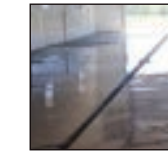

Insulation

R-28 in the walls, and R-40 to R-60 in the attic offer warmth and protection

Detailed Finishes

Tackrooms, washbays, and office spaces get you fully functioning in your new building

Drains

Keep your floors clean and dry with a pit or trench-style drain

CONSTRUCTION PROCESS

Each crew is trained to work hard for you. Enjoy a seamless process from project start to finish with your Remuda Team!

SALES

1. Design conversations and planning
2. Prompt and clear pricing
3. Site visits to assist with your pre-build consideration. We will be happy to layout your building in different locations and look at all the different factors that may affect the overall cost and the end result

PROJECTS

1. Drawings and design review. We ensure you are 100% happy with the design before ordering commences
2. Assistance with County permitting
3. Clear communication of timeline and schedule
4. Complete underground utility locates
5. Coordinate material deliveries

CONSTRUCTION

1. Building team onsite—our construction team is well trained and employed by Remuda
2. Coordination of any sub trades and scheduling
3. Completion walk through
4. Customer care package

“Masterfully constructed, these guys really know what they’re doing.”

— Karin, Conrich AB
